| <b>Name:</b> Crestview Ridge Knox | <b>Lab Reference #:</b> 977181          |
| <b>Breed:</b> Miniature Poodle    | <b>Sample Date:</b> 04/27/2026          |
| <b>Phenotype:</b> Auburn/ White   | <b>Research Date:</b> 04/27/2026        |
| <b>Sex:</b> Male                  | <b>Microchip:</b> 901001000086763       |
| <b>Birth:</b> 06/03/2025          | <b>American Kennel Club:</b> PR29667201 |

| Disorder Results(6 of 16) |     |                                                                                          |
|---------------------------|-----|------------------------------------------------------------------------------------------|
| CDDY                      | N/N | Clear: Dog is negative for the mutation associated with CDDY.                            |
| CDPA                      | N/N | Clear: Dog is negative for the CDPA mutation.                                            |
| DM                        | n/n | Clear: Dog is negative for mutation associated with Degenerative Myelopathy.             |
| NEwS                      | n/n | Clear: Dog is negative for mutation associated with NEwS.                                |
| PRA-prcd                  | n/n | Negative: Dog is negative for the mutation associated with prcd-PRA.                     |
| vWD1                      | n/n | Clear: Dog is negative for the mutation associated with von Willebrand's Disease Type I. |

| Color Results(5 of 16)     |       |                                                                                                  |
|----------------------------|-------|--------------------------------------------------------------------------------------------------|
| A-Locus                    | at/at | Dog has two copies of the gene causing tan points.                                               |
| B-Locus                    | B/B   | Dog does not carry the mutation for most forms of chocolate coloration.                          |
| D-Locus                    | D/D   | Negative: Dog is negative for the mutation associated with a diluted coat color.                 |
| E-Locus (E, EM, eA, eW, e) | e/e   | Dog has two copies of cream/yellow.                                                              |
| K-Locus                    | n/n   | Dog is negative for the KB allele, and the coat coloration will be based on the agouti genotype. |

## Genetic Testing Report

### Crestview Ridge Knox

#### Pattern Results(1 of 16)

|         |            |                                                                                                                              |
|---------|------------|------------------------------------------------------------------------------------------------------------------------------|
| S-Locus | <b>n/S</b> | Heterozygous: Dog has one copy of S-Locus. Results vary according to breed, with some limited white spotting in some breeds. |
|---------|------------|------------------------------------------------------------------------------------------------------------------------------|

#### Trait Results(4 of 16)

|                   |                                    |                                                                                                                                                                                                        |
|-------------------|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Curl 1&2          | <b>C<sup>1</sup>/C<sup>1</sup></b> | The dog has two copies of the hair curl allele. The dog will have curly hair, and will always pass on a copy of the hair curl allele to any offspring. All offspring of this dog will have curly hair. |
| Furnishings       | <b>F/F</b>                         | Furnished: Dog has two copies of the furnishings mutation and will always produce offspring with a furnished coat.                                                                                     |
| Hair Length (1-5) | <b>l<sup>1</sup>/l<sup>1</sup></b> | Two copies of the long-hair allele, dog will have longer than average hair per the breed standard.                                                                                                     |
| Shedding          | <b>n/n</b>                         | Dog has no copies of the shedding allele. The dog will have a low propensity towards shedding.                                                                                                         |
